## Women's income and risk of intimate partner violence: secondary findings from the MAISHA cluster randomised trial in North-Western Tanzania

Tanya Abramsky<sup>1\*</sup>, Shelley Lees<sup>1</sup>, Heidi Stöckl<sup>1</sup>, Sheila Harvey<sup>1,2</sup>, Imma Kapinga<sup>2</sup>, Meghna Ranganathan<sup>1</sup>, Gerry Mshana<sup>2,4</sup> and Saidi Kapiga<sup>2,3</sup>

### In this secondary analysis...

We examined cross-sectional and longitudinal associations between women's income and IPV among 740 married/cohabiting women participating in the MAISHA study in Mwanza city, Tanzania.

All women were enrolled in a microfinance programme and almost all were self-employed.
